Functions

- Side marker lamp
- For automotive use only
- The lamp has road approval ECE R148, R10 authorizing it to be used on public roads
- The lamp is intended for vehicles with 12/24V installation
- Reverse polarity protection

Mounting method

- Installation only in specialized workshops or professional service
- Lamps must be installed only in accordance with the UNECE regulations

Wire connection

FUNCTION	WIRES COLOR
Ground	White
Plus	Red

The connection between the lamp and vehicle's installation should be isolated with heat-shrink tube, to avoid getting water and moisture to the copper wire of the lamp, which can damage electronic components and flood the lamp with water.

Warnings

- Use as intended
- Use in airy places
- Do not touch the lamp during operation and immediately after it is turned off, the lamp may get warm
- Any unauthorized interference with the lamp (associated with its depressurization, interference with the electronic system, etc.) is associated with the loss of warranty
- The device must be installed and kept out of reach of children
- Do not cut off tinned ends.

Important! Do not look directly at the light. It can cause the eye damage
